

# WASTElink®

## The efficient way to manage waste

WASTElink is a powerful real time system designed to effectively manage the processing and storage of waste products.

**WASTElink tracks each stage of your hazardous waste process, providing a real-time tracking system from start to finish**

Meeting environmental requirements and increasing productivity are just two of the reasons to invest in WASTElink

## Key Benefits

- Accurately track and trace waste products.
- Meets Environment Agency requirements.
- Increase productivity through automated data capture.
- Reduce administration costs.
- Improve customer service.
- Easy to use software reduces training requirements.

*"We needed to meet environmental requirements allowing real time access to the location of hazardous waste within our recycling plant. WASTElink gives us instant access to track waste and has increased our productivity saving us time worth over £1500 a year.*

*AM Labels provided an end-to-end service, from setting up a wireless network, supplying hardware, software and labels to installation and training of the system."*

*Andy Cusworth, Site Manager, Waste Recycling Ltd*

# WASTElink®

## The efficient way to manage waste

WASTElink is a powerful real time system designed to effectively manage the processing and storage of waste products.

### WASTElink Office Administration Software

The office administration software allows the user to:

- Record customer and internal orders
- View item movements in real time
- Record stock takes / audits
- Print waste tracking labels with unique barcodes
- Review transaction history for each waste product
- Generate reports for onsite stock and inactive items
- Review stock take information
- Create user defined locations.

### WASTElink PDA Software

WASTElink Mobile software will run on many Windows devices. The software in the PDA will allow users to:

- Record waste movements in real time using built in barcode scanner
- Accurately record data for stock takes/audits
- Transmit data automatically through to the administration software.

### Service & Support

WASTElink' has been developed by our in-house technical team in close consultation with operators within waste recycling industries.

Software can be adapted to meet your exact requirements and is fully backed by our dedicated customer support team.

Designed in consultation with site managers, this highly accurate and efficient system fully meets the requirements of the Environment Agency for the management of hazardous waste in waste processing centres.

WASTElink software is a product from AM Labels Ltd. Specifications are subject to change without notice.
