

AM Stand-Alone Label Printing System

Print your labels without being attached to a PC

Ideal for label printing in distributed or remote locations

- PC not needed to print labels
- Print labels on-demand
- Use variety of external devices, including numeric or QWERTY keypad or scanner
- Colour LCD Screen with high visibility
- Store database on USB dongle
- Built-in Real time clock for date coded labelling

The **AM Stand-Alone label printing system** allows you to create and produce labels at the click of a button, without the need to be connected to a PC. Ideal for when environmental, cost or other reasons prevent you from using a PC.

Designed for label printing in distributed or remote locations, the Intermec range printers, combined with our in-house developed software application, gives you the ability to store and update your product database on the printer via USB memory.

The labelling software is stored on the printer and the only additional requirement is a standard plug in numeric or QWERTY keypad.

Applications

Warehouse Management

Bakery Labels

Medical Labelling

Retail Labels

Food / Ingredient Labels

Library Management
