STOCKlink® LITE

am LABELS

Simple stock audit system with full user customisation and easy to use inteface.

Designed for small to medium sized companies, or even larger companies where a stock take is required which cannot be acheived with current system.

Stocklink lite is a streamlined version of our popular Stocklink software. Focusing on stock auditing, it allows simple scanning of stock and reports of scan produced.

Stocklink lite will work with any Windows mobile or Windows CE devices but it has been designed with and has the option of being bundled with the Honeywell dolphin 6000, the cost effective, fully featured PDA phone with advanced built in connectivity.

Key Benefits:

- Cost effective solution for stock take / auditing.

- Customisable product fields up to a maximum of three.

- Easy to use interface and report exporter.

- Scan history of current session.

- Ability to add new products at any time.

Simple audit process:
Upload excel stock database file to handheld (csv comma delimeted format)

⬇

Scan stock and assign quantity and location

⬇

Download stock database to PC and create report.
